

MCR2030 Webinar Series

“Digital Resilience: Opportunities and Challenges for Europe and Central Asia”

Webinar 2: Implementing Digital Resilience: The role of Digitalisation in Emergency Response and Post-war Recovery

Thursday the 19 Jan 2023 10:00am – 11:30am CET

Register here: https://undrr.zoom.us/webinar/register/WN_rHARRvEKTx56pRT88fzSg

As part of the MCR2030 Digital Resilience Webinar Series, the second webinar on Implementing Digital Resilience aims to support Ukrainian cities on how to use digital technologies and innovations to respond to emergencies, reconstruction and recovery. Building on the experiences shared by European cities and experts during the first webinar on [Understanding Digital Resilience: Opportunities and Challenges](#) in November 2022, this webinar considers how digital technologies can help cities and communities to build resilient systems that incorporate humanitarian aid, socio-economic regeneration and structural governance reforms with long-term sustainable development? Embedding the principles of agility and transparency in risk governance and decision-making, speakers will explore how Ukraine could harness the potential of data and technology in areas such as nature based solutions, disaster damage and loss assessments, social media analytics, data mining, reconstruction modelling, and urban neighbourhood regeneration, to develop effective digital resilience systems, and provide an enabling environment for building back better, that can ensure having a socially just and green transition.

Agenda		
Time	Topic	Speaker
5 min	Welcome and introduction	Helena Monteiro, MCR2030 Coordination and Project Support Specialist, UNDRR
5 min	Building Urban Resilience in Conflict and fragile settings: The role of Digitalisation	Vasileios Latinos, Coordinator, Urban Resilience and Climate Adaptation, ICLEI European Secretariat
